

IAAS

✘ STORAGE

- Media storage
- High-performance storage
- Eco-storage
- S3-compatible storage

SWISS TXT offers storage solutions to meet all requirements. Quality and security are ensured by two redundant Swiss data centres with high availability. We meet the public data privacy guidelines for data centres certified in accordance with ISO.

✘ SWISS MEDIA CLOUD

- Cloud hosting
- Cloud automation

SWISS TXT offers 62 Gbit/s broadband internet peering and state-of-the-art technology and procedures such as Cloud-Stack, IaC, CI/CD. Our service is rounded out by 7x24 support and DevOps.

✘ PLAYOUT

- Content delivery network (CDN)
- Live streaming
- HbbTV live streaming
- Akamai streaming
- Video on Demand

SWISS TXT operates its own Swiss delivery platform for local content. As an Akamai partner, we enable global streaming. You benefit from a low-cost architecture thanks to automated load balancing.

✘ SERVICE DESCRIPTION

- Self-service portal (for computing, backup, storage and network services).
- Servers (CPU, RAM, hard drive) can be prepared and scaled within minutes at the push of a button.
- The client can select the computer centre. A computer centre can be allocated for each virtual server.
- Multi-client capability, demarcation and isolation of the various client environments.
- A variety of storage levels – from high performance storage with a short latency (SSD) to cost-effective nearline storage for multimedia archives.
- Client-oriented service management processes (incident, problem and change processes) as well as short intervention times in case of incidents.
- Outstanding disaster tolerance, excellent cost efficiency, high scalability, high bandwidths for online content delivery, as well as high levels of standardization, agility and flexibility.
- The infrastructure can be automated using an open API (DevOps, continuous deployment and integration).
- Integration with configuration management tools (Puppet, Ansible) for a full automated infrastructure.
- Loadbalancing for load distribution and maximum availability.
- Identical test, integration and production environments can be mirrored easily.

✘ BENEFITS

- Pay-as-you go system: save time and money.
- No need to operate an in-house IT infrastructure.
- Automation and self-service for independence and agility.

2'000 virtual machines

1.5 PB of data distributed each month

8.8 PB media storage

76 EST hosts with a total of 17 TB RAM
