SWISS SME CLOUD - CIRRUS

✘ SELF-SERVICE PORTAL

The portal is designed to be intuitive and easy to use. You can set up your IT environment in just a few clicks.

With our templates and services you can make use of a wide range of automated workflows.

When you choose SWISS TXT, you're helping your IT department and operational divisions to reduce their operating expenses, as well as making your business more flexible.

- Client capability
- Automation
- Scalability
- Complete cost control

✘ SWISS DATA CENTRE

All our data and data centres are located in Switzerland and exclusively subject to Swiss law.

High levels of quality and security are guaranteed thanks to our two redundant, high-availability Swiss data centres. They are operated according to ISO27001 standards and comply fully with all public data protection guidelines.

- High security and availability thanks to built-in redundancy
- Your data kept safe and sound in Switzerland
- The latest technology

✘ HYBRID CLOUD

We all know it's never a good idea to put all your eggs in one basket, and that you should always have a backup plan. Just like a diversified financial portfolio, a diversified cloud strategy encompasses multiple providers with a range of different options, so you can reduce your exposure to risks like dependency, contractual constraints and inflexibility.

A good cloud strategy can protect you from dependency at the same time as giving you a flexible, dynamic solution that adapts to the volatile cloud market.

- Combines the advantages of public and private cloud services to give you the best of both worlds
- Agility: A flexible, dynamic system that adapts to the volatile cloud market
- Diversification prevents dependency on one provider

✘ IAAS

SWISS TXT offers 62 Gbit/s broadband Internet peering alongside state-of-the-art technology and systems including IaC, CI/CD and CloudStack. Our packages come complete with 24/7 technical support and a DevOps approach.

Whatever you need, SWISS TXT has a storage solution to suit you.

- Cloud hosting
- Cloud automation
- Storage
- Load-balancing
- Open API

✘ PAAS

Thanks to our passion for cutting-edge technology, we can offer our customers a state-of-the-art PaaS solution.

- Kubernetes
- Docker

SWISS SME CLOUD - CIRRUS

SERVICE SPECIFICATION

- Self-service portal (for computing, backup, storage and network services).
- Servers provided and scaled (CPU, RAM, hard drive) within minutes at the touch of a button.
- Customers are free to choose their own data centre. A data centre can be allocated for each virtual server.
- Multi-client capability thanks to separate, isolated individual customer environments.
- A range of storage options – from high-performance storage with short latencies (SSD) to great value near-line storage for multimedia archives.
- Customer-focused service management processes (including incident, problem and change processes), and quick action in the event of disruption.
- Outstanding disaster recovery, excellent value for money, high scalability and high bandwidths for the provision of online context, along with high levels of standardisation, agility and flexibility.
- Integration with configuration management tools, including Puppet and Ansible, allowing complete infrastructure automation.
- Load-balancing for the highest levels of availability.
- Easily create identical test, integration and production environments.

BENEFITS FOR YOU

PAY-AS-YOU-GO

- Purchase resources flexibly as and when you need them, thus avoiding high initial investment costs.
- With the interactive, intuitive cloud portal from SWISS TXT you're always in complete control of your business and your costs.
- Save time, money and stress

STICK TO WHAT YOU DO BEST

- Avoid the expense and worry that comes with operating your own IT infrastructure. Leave your IT to the professionals and get on with what you do best – running a successful business.
- You can rely on SWISS TXT's know-how and expertise whenever you need it.

AUTOMATION TAKEN CARE OF

- Infrastructure can be automated using a public API, including for DevOps, continuous deployment & integration.
- The SWISS SME CLOUD portal comes with a range of templates (VM's) for you to use.
